

Abstract

A method of providing self service banking to a customer, e.g. over the Internet or through interactive television). The customer is presented with a display containing icons representing a number of accounts, and icons representing money in a selected account. When the customer transfers money from the currently selected account to another account, this transfer is displayed graphically by one or more of the money icons moving from the selected account to the destination account. The transfer may be made by dragging and dropping the money icons on to the icon representing the destination account, or by selecting the amount to transfer and the destination account and then confirming the transfer.
